SUMIT YADAV

New Delhi | +91-9260963952 | sumityadavtg@gmail.com | LinkedIn ↗ | LeetCode ↗

Professional Summary

Java Backend Developer with 3 years of experience building scalable **Spring Boot microservices and RESTful APIs** for enterprise FinTech systems. Skilled in event-driven integrations, reusable backend design, production debugging, and secure software delivery.

Experience

Tata Consultancy Services **Oct. 2023 – Present**

Java Spring Boot Developer – Integrations *Bengaluru, India*

- **Backend Architecture:** Built ***Spring Boot microservices and RESTful APIs*** for digital loan-origination workflows using ***event-driven architecture***, ***reactive programming***, async callbacks, and scheduled processing.
- **Reusable Engineering:** Developed ***reusable code and common libraries*** for API clients, validation, object mapping, exception handling, logging, and standardized responses.
- **KYC and Security:** Integrated ***UIDAI Aadhaar, NSDL PAN validation, and DigiLocker***; implemented ***secure data handling***, request validation, audit tracking, and resilient error handling.
- **Banking Data and Underwriting:** Delivered net-banking and ***Account Aggregator*** consent flows; transformed statement JSON into income, cash-flow, balance, transaction, and risk insights for ***credit decisioning***.
- **Risk and Digital Documents:** Integrated ***work-email and employer verification***, fraud screening, and ***NeSL eSign/eStamp*** with callback handling, reconciliation, retries, and failure recovery.
- **Technical Collaboration:** Participated in ***technical discussions***, clarified requirements, proposed ***task implementation solutions***, identified edge cases, and supported design and code reviews.
- **Production and Deployment:** Diagnosed customer-impacting defects, performed ***root-cause analysis*** in the ***production environment***, and used ***Spring Boot Actuator, structured logs, and Jenkins*** to validate fixes and support ***deployment procedures***.
- **Dynamic Payload Mapping with GraalJS:** Integrated ***runtime JavaScript-based mappers*** for client-specific request and response transformations without code commits or redeployment.

Technical Skills

Backend: Java, Javascript, Spring Boot, Microservices, RESTful APIs, Event-Driven Architecture, Reactive Programming, Spring Data JPA, Spring Security, Spring Validation, Spring AOP, OAuth 2.0

Engineering: Reusable Code, Common Libraries, Web Application Security, Debugging, Root-Cause Analysis, Exception Handling, API/Integration Testing, Deployment Procedures

Integrations: Digital Lending, Loan Origination, KYC, Aadhaar, PAN Validation, DigiLocker, Account Aggregator, Bank-Statement Analysis, Credit Decisioning, Fraud/Risk Assessment, eSign, eStamp

Data and Tools: Python, Git, GitHub, SQL, MySQL, Jenkins, Docker, Kubernetes (Basics), Postman, Swagger/OpenAPI, JSON, XML

Computer Science Fundamentals

- Data Structures and Algorithms
- Database Management Systems
- Object-Oriented Programming
- Cloud Computing

Achievements

- **Solved 700+ DSA problems** ↗ across LeetCode and GeeksforGeeks.
- **LeetCode Contest Rating: 1940 (Knight)** ↗ – ranked in the top 3% worldwide.
- **Grand Finalist in TechGig's national-level coding competition** ↗, securing rank 934 worldwide.
- **CodeKaze'23: ranked 1,235** ↗ among approximately 150,000 participants.

Education

B.Tech. in Electronics and Communication Engineering **Aug. 2019 – Jul. 2023**

PSIT College of Engineering *8.5 CGPA*

- Department Topper of the Institute.
- Sponsored by University for acedemic excellence.
